

To obtain a stable URL for a specific Image Group, you must first open the Image Group so that its thumbnails are displayed on a Thumbnail Page. Then, click on the "Image Groups" toolbar button and select the "Display Image Group URL" option. In the dialog box that appears, click on the URL value to select it.

Press "Ctrl-" (or ⌘) C on your keyboard to copy the URL value to the clipboard. Then, press "Ctrl-" (or ⌘) V to paste the URL link into a web page, email, or other electronic document. When visitors click on the link for that URL, they will be taken directly to the first image that Image Group displayed in the Image Viewer. They can use the navigation arrows in the bottom right corner of the Image Viewer window to page through the images in the Image Group (|◀◀ 13 of 2532 ▶▶|). Please note that you must be within your institution's valid IP range for the link to function properly.

Note: You can create links to any Image Groups to which you have access to view, including those Image Groups that are saved in your private "My Work Folder"
